

## Field Paint/Repair Procedures

---

- Contact PDL Customer Service to verify the type of paint used on the doors supplied with your order. This will determine the type of paint best used for repainting. Note: not all paints work together, if verification is not done there is potential for finish issues upon repainting.
- Sand door and frames or damaged area with 180 grit sandpaper
- Remove all dust away by wiping with damp cloth and let dry
- If applicable, repair doors with plastic filler putty (Bond-o) and let dry
- If repair is applicable, sand area with 180 grit sandpaper then again with 320 grit sandpaper to finish/feather repaired area
- Remove all dust away by wiping with damp cloth and let dry
- Repaint with primer or color paint, being careful to blend paint
